OBJECTIVE

My short-term objective is to complete my Bachelors in Software Engineering and acquire intermediate level skills in the field of Web Development (esp. React).

In the long-run, I aspire to become a full-Stack Web Developer and work on MERN Stack.

SUMMARY

Compassionate, creative and effective resource with diverse experience in developing and managing IT systems in domains; such as Hospital Management and Real Estate. Working experience in HTML, CSS, JS, JSON, Firebase and MySQL. Experience of developing web-based systems. Competent at performing independently and in teams on achieving project objectives within timelines with speed and accuracy. Good organizational and time management skills. Good Analytical and Communication skills. Eager to learn and work on latest technologies.

SKILLS

- ✓ HTML
- ✓ CSS
- ✓ JavaScript
- ✓ React
- ✓ Firebase
- ✓ MySQL
- ✓ Office Apps (Word, Excel, Power Point)

EXPERTISE

My expertise includes developing website using the most updated technologies i.e. HTML5, CSS3 AND JS. I have worked on the Web framework, Reactjs which is most demanding in the market. My Final Year Project is also based on web and technology used for developing frontend is Reactjs. I have worked on scraping data using react and vanilla JS. My expertise also includes using Firebase and MySQL as a place for storing data.
